INSTRUMENTATION

AMS – Advanced Management System

The JCB Advanced Management System matches engine power and pump output to optimise machine performance in each of the four selectable work modes –

H (Heavy)	100% engine and hydraulic power for maximum output.
S (Standard)	90% engine and hydraulic power for good economical output.
L (Light)	70% engine and hydraulic power for precision finishing and low fuel consumption.
F (Fine)	70% power with permanent power boost for maximum lifting ability.

The system monitors all critical machine functions and operator selections which are shown on the display panel, conveniently mounted in the operators line of site. The diagnostic function built into the system constantly monitors machine usage and performance, as well as providing the service engineer with valuable information on any machine fault.

STANDARD EXCAVATING BUCKETS

All buckets are JCB – Esco fully welded steel, with sealed, hardened steel pivot pins and replaceable wear parts.
